Dear Dr Masese,

RE: INVITATION TO MACHINE LEARNING FOR ALL HACKATHON

Jenga school in partnership with Zindi Africa has organized a 5-day Machine Learning for All Hackathon to be held from **21st, November to 25th, November 2022**. The event is targeting machine learning enthusiasts in higher learning institutions from all over Africa to work in groups of 5 to create interesting machine learning solutions using a local dataset to create interesting solutions. The objective of this competition is to build a model to recognise ten different everyday Kenya School Language signs present in the images, using machine learning or deep learning algorithms. We, therefore, take this opportunity to invite your department to be part of the hackathon as a participant or sponsor which will be held virtually, and the final day event will be at the University of Nairobi Auditorium. Your presence will be beyond valuable to us.

Thank you for your time. We look forward to seeing you.

Sincerely,

Dr. Lawrence Nderu

On behalf of the organizing committee,
